BirdsRecord

Farmer / Breeder Guide

Simple guide: birds, pairs, eggs, chicks aur pedigree kaise save karein - bina internet ke.

Yeh guide Pakistani bird breeders (lovebird, budgie, cockatiel, ringneck, waghaira) ke liye Roman Urdu + simple English mein likhi gayi hai. Phone pe app open rakho aur step-by-step follow karo.

1. Yeh app kya karti hai?

BirdsRecord aapke breeding records phone pe save karti hai:

- Birds - ring number, species, mutation, gender, hatch date, photo, parents
- Pairs - male + female breeding pair
- Eggs & chicks - har round ke eggs, hatch, naye chicks
- Pedigree - 3 generation family tree (bird, parents, grandparents)

Tip: Internet zaroori nahi. Sab data phone pe rehta hai (offline-first).

2. Pehli baar app kholo

- Neeche 3 tabs: Birds | Pairs | Settings
- Settings -> Species & mutations - starter list check karo
- Apni species missing ho to + se add karo (name + incubation days)

3. Naya bird add karna

Birds tab -> Add bird:

- 1) Photo (optional): Camera ya Gallery
- 2) Ring / band number (zaroori) + Ring year
- 3) Species - list se choose (search se dhundo)
- 4) Mutation - optional (None / not sure bhi chalega)
- 5) Gender: Male / Female / Unknown
- 6) Hatch date (optional)
- 7) Parents: list se select, YA ring number type karo agar bird list mein nahi
- 8) Status, cage, notes -> Save

Tip: Agar wahi ring pehle se maujood ho to warning aayegi. Save anyway se bhi save ho sakta hai.

4. Bird detail aur pedigree

Bird list se kisi bird pe tap karo:

- Upar details: ring, species, age, cage, father/mother
- Pedigree: 3 generations - left = yeh bird, middle = parents, right = grandparents
- Blue border = male, pink = female
- not in list = parent app mein save nahi, sirf ring likha hai
- Box pe tap = us bird ko open (agar list mein hai)
- ? = unknown / abhi data nahi

5. Breeding pair banana

Pehle male aur female birds add karo, phir:

- 1) Pairs -> New pair
- 2) Male aur Female select karo -> Save
- 3) Pair open karo
- 4) New round - jab hen lay start kare
- 5) Add egg - lay date dalein
- 6) Egg pe tap -> Fertile / Infertile / Hatched / Failed / Reset...
- 7) Hatched - add chick as a bird -> chick form parents ke sath khulta hai -> Save

Tip: Agar chick form Cancel kar do to egg hatched mark NAHI hota. Ye intentional hai.

6. Backup - data safe rakho

Settings screen:

- Export backup - JSON file banakar WhatsApp / Drive / Files mein share karo
- Restore backup - purani file se data wapas (CURRENT data replace ho jata hai)

Tip: Abhi photos backup mein shamil NAHI hain. Records (birds, pairs, eggs) save ho jate hain. Hafte mein kam az kam 1 baar export karo.

7. Roz / mausam ka simple flow

- Naya bird aaya -> Birds -> Add bird
- Pair lagaya -> Pairs -> New pair
- Ande -> Round -> Add egg -> status update
- Hatch -> chick as bird save
- Weekend -> Settings -> Export backup

8. Common sawalat (FAQ)

Q: Internet chahiye?

A: Nahi. App offline chalti hai.

Q: Parent list mein nahi hai?

A: Father/Mother ring number type kar do. Pedigree mein not in list dikhega.

Q: Bird delete karun to chicks?

A: Chicks reh jate hain; parent ki ring text save rehti hai.

Q: Kitni pedigree generations?

A: 3 (bird, parents, grandparents). MVP ke liye kaafi.

Q: Duplicate ring?

A: Warning aati hai; Save anyway se allow hai.

Q: Species / mutation add?

A: Form pe + icon, ya Settings -> Species & mutations.

Q: Pair end karna?

A: Pair detail pe End pair - status ended ho jata hai.

9. Best practices

- Har bird ka unique ring + year likho
- Parents jab ho saken list se link karo - pedigree strong hoti hai
- Egg status regularly update karo (fertile / infertile / hatched)
- Phone change / lose se pehle Export backup zaroor lo
- Incubation days species pe set raho - due date andaze ke liye

10. Contact / product

App name: BirdsRecord

Domain: birdsrecord.com

Yeh guide MVP (offline) ke liye hai. Baad mein premium features (cloud backup, PDF pedigree certificate) planned hain.

Shukriya - apne birds ke records seedhe aur safe rakhein.
